THE
Cælestial DIARY:
OR, AN
EPHEMERIS.

For the YEAR of
Our blessed SAVIOUR's Incarnation,
1735.

It being the first after Bissextile, or Leap-Year, and from the Creation of the World, according to the best of History, 5682 Years.

Wherein is contain'd the Motions, Aspects, and Operation of the Planets, with Observations on the Eclipses and Solar Ingresses; with other remarkable Passages, as the Moon's southing, Sun and Moon's rising and setting, and monthly Observations &c.

Calculated according to Art, and referr'd to the Meridian of the midst of GREAT-BRITAIN, fitting the whole Monarchy without sensible Error.

The Seventeenth IMPRESSION.

By SALEM PEARCE Student in Phytick
and the Cœlestial Science.

Lift up your Eyes to the Heavens, and look upon the Earth beneath, for the Heavens shall vanish away like Smoke, and the Earth shall wax old like a Garment, and they that dwell therein shall die in like manner; Isai. 51. 6.

Imprimatur, F. Allen.

LONDON, Printed by S. Dawks, for the
COMPANY of STATIONERS, 1735.

Ephemerides. h.

A Table of TERMS and Returns. for the Year 1735.

| 24 | 0 | 2 | 16 | 0 | 12 | 0 | 5 | 12 | 0 | 18 | 0 | 8 | 8 | 0 | 24 | 0 | 11 | 4 | 0 |

EXAMPLE.

At 2 d. 1 q. 2 Pound, what is the Price of the Great Hundred? Look in the Left hand Column for 2 d. 1 q. and just against it in the next Column towards the Right-hand you will find 1 l. 1 s. 0 d.

Again, Suppose Goods were sold at 11 d. 1 q. a Pound, what is the Price of the Great Hundred? Look in the fourth Column towards the Right-hand in the Table, and you will find 5 l. 5 s. 0 d. the true Price thereof; the Table being so plain and easy, we need not trouble the Reader with any more Examples, &c.

Note For every Farthing that one Pound costs, reckon 2 1/4 d. and that's the Price of the great Hundred.

A Table of INTEREST at Five per Cent.

| 1000 | 20 | 10 | 0 | 84 | 0 | 64 | 0 | 27 | 0 | 37 | 10 | 40 | 1000 |

Enter this Table on the Left hand side under *Lib.* with your Sum (that you would know the Interest thereof,) and in the Head of the Table for your Time, and in the Angle of meeting you will have your Desire. Example.

Suppose the Sum were 20 *l.* I enter under *Lib.* with the same, and against the Sum I find for One Week 5 *d.* For One Month 1 *s.* 8 *d.* For Two Months 3 *s.* 4 *d.* For Three Months 5 *s.* For Six Months 10 *s.* For Nine Months 15 *s.* For a Year 1 *l.* &c. With any other Sum you may do after this manner, and you'll have your Desire.

A general Tide-Table.

| 27 John | 1199 | 17 | whom GOD preserve. | | |

A pious King is of the Noblest Birth,
 Sent forth by GOD to rouse the drowsy Earl,
 By his Rich Vertues, and good Laws will the,
 Which are his Subjects gladly him Obey,
 And after Death with Christ he'll Reign for Ay.
 GOD grant our King may such a Portion have,
 In endless Bliss his precious Soul thou'lt Save.

January hath XXXI Days.

One Evening walking (by myself alone,) }
 My Thoughts were given to Meditation,
 Thro' Fields, and Meadows, thence I took my way,
 The Herbs and Flowers, I careful did Survey,
 For Vestæ then appeared fine and Gay. }

[illegible]

February hath XXVIII Day

Whilst in the Bushes Birds did bravely Sing,
Rejoycing greatly in the Pleasant Spring,
Fruit-Trees in Blossom Fragrant Flow'rs distill,
Perfum'd the Air with Odour, and Sweet Smell.
Which pleasant Prospect did divert my Mind,
Inclin'd my Thoughts, new Rarities to find.

Monthly Observations.

If Soland (last Year) were oblig'd to bow, Methinks 'tis dang'rous it thou'd likewise now, Look and beh'ld how Mars and Saturn Rage, As tho' no forces would their Anger swage, But hold a little and you'll see it done, Even by Phæbus and stout Phæton: And Sextiles, Aspects moderate warm the Air, Inclines Man's Actions to be Just and Fair, So that 'tis hop'd Mundane Affairs will still, (By God's great Pow'r) de-fended be from Ill, That Merchant-Men (who cross the Ocean wide) May safe return with Cargo by their side, And we at Home may Live in Peace and Love, That GOD may Crown with Blessing from above

hence, the Roman Account is always 11 Days before the English, so that their 12th is our first, &c.

March hath XXXI Days.

In walking to and fro at length did spy,
A Chryſſial River to which I drew nigh,
Being ſomewhat weary (on the River's ſide)
I ſat down there and did ſometime abide,
Th' murmuring Water paſſed by my Side.

Monthly Observations.

On the first Day of this Month 1682, was born Her Majesty Queen CAROLINE.

Many secret Consultations and Debates are about this time Promoted — And several guilty Persons do now fear their dark Designs will be suddenly discovered, and their unworthy Persons exposed to publick Censure.

Base wicked Men are striving for their will, But Providence defends them from it still. These are the Monsters of Men, that are continually delining and plotting, but must never expect Success answerable to their Desires, since divine Providence over-rules and counter-plots all their damnable Inventions; which are fomented by the Prince of Darkness — However, the People of this Island seem to be pretty easy and contented, and I hope that they study for each Man's true Peace and Tranquillity.

April hath XXX Days.

All things are full of Labour (than said I,)
 That 'tis too hard for me (therein to prie,)
 To know their Order, or their Ways decry.
 Being sat a while, I paus'd thereon a Space,
 Which made my Thoughts to magnify apace,
 Till Tears began to trickle down my Face,

Monthly Observations.

[illegible]

May hath XXXI Days.

606: Glorious beams were then beneath my Sight,
 Earth's sable Mantle it had screen'd his Light;
 The Air clear the Stars appeared bright:
 (And being made a Creature Rational,
 I view'd the Course of Heav'n's Star spangled Ball;
 With Reverence, and great Delight with all.

JUNE hath XXX Days.

To think that Man should in that Image be,
 Who made those Lights and that large Canopy,
 Wherein their Orbs have Room to square their Light,
 As Wisdom form'd and plac'd them for our Sight,
 That we shoul'd honour and adore his Name
 Who made the Earth, and did the Heaven's Frame.

JULY hath XXXI Days.

Such Contemplations cheers my drooping Soul,
Which needs must sink, if 'twere not to behold
Those wond'rous Works which thou ordain'st of old.
Now in this Land no Atheism can be,
Nor Infidel, here is no room for thee,
For every Thing declares a Deity.

AUGUST hath XXXI Days.

The Sun and Moon, in Number Planets seven,
They were ordained by the God of Heaven;
Distinctly placed with their Orbs below,
The fixed Heavens, that they might foreshow,
How they on us their Influence bestow.

SEPTEMBER hath XXX Days.

The Herbs and Flowers which the Earth do bear,
Behold! how good, they in their Season are?
Some for Food and Physick, and some cure Wounds;
God's Wisdom and his Goodness have no Bounds,
Like Nilus flows; therefore remains that we,
Should thank and praise him still incessantly.

Methinks the General Affairs of this Nation appear in a reasonable good Order, even beyond the Expectation of many. --God grant a long Continuance thereof--We know that after a Storm comes a Calm. Pleasing News approaches, and the Spirits of the People in general are not a little revived--We know Death can find us out when we least expect it; and why should we dread that which we can by no Means prevent?

Lastly, our Kingdom of England appears happy in the many Returns of her Ships from remote Parts of the World, and (according to the present Juncture of Affairs) we are made also happy with welcome Intelligence about this Time, &c.

For George our King, and [Country let us pray, That God may bless him, also [you alway.

OCTOBER hath XXXI Days.

For all his Goodness and fatherly Care,
 Who feeds and clothes us, and preserves us here;
 Who sent his Son among us here on Earth,
 For to redeem us from eternal Death,
 Into his Favour, which were left undone,
 Now capable of CHRIST's Salvation,

NOVEMBER hath XXX Days.

Therefore my Friend now prithee come to me,
I crave thy Pardon, don't be angry :
What is the Cause so many Sects are here,
And Sorts of Doctrines which do now appear,
Scarce all be grounded firmly and sincere.

DECEMBER hath XXXI Days.

CHRIST is the Door and Shepherd of the Sheep,
 All those that come to him he'll surely keep:
 But such as climbeth up another Way,
 Our Blessed SAVIOUR doth expressly say,
 They're Thieves and Robbers; which he'll in his Ire
 Condemn, and cast into Eternal Fire.

- ♍ The Virgin chaste defends the Belly-part,
- ♎ The Reins and Loins the equal Ballance share,
- ♏ The Scorpion o're the Secrets take Care,
- ♐ The Archer boldly challenges the Thighs,
- ♑ The bended nees Kupon the Goat relies,
- ♒ Aquarius Pitchers full of Water drill,
- ♓ Pisces the Fish, you may catch if have Skill,

PEARSE, 1735.

THE
Second PART
OF THE
Cælestial DIARY,

CONTAINING,
A CHRONOLOGY of many
Remarkable Accidences and Occurrences that
have happen'd since the Creation of the
World, to this present Time.

With Astrological Observations upon the Eclip-
ses, Solar Ingresses, Various Positions, Aspects,
and Configurations of the Heavenly Bodies,
with many other Considerable Matters.

By SALEM PEARSE,
Student in Physick and Cælestial Science.

Wisdom VII. 17. 18, 19, 20.

For he hath given me certain Knowledge of Things that are. Name-
ly, to know how the World was made, and the Operation of the
Elements; the Beginning, Ending, and Middle of the Times; the
Alterations of the Turning of the Sun, and Change of Seasons: The
Circuits of Years, and Positions of Stars, the Nature of Living
Creatures, and the Furies of Wild Beasts, the Violence of Winds,
and the Reasoning of Men; the Diversities of Plants, and the
Virtues of Roots.

L O N D O N:
Printed by Jacob Hive, for the Company of
STATIONERS. 1735.

Astrologa

Astrological Observations

On the ECLIPSES which will
happen in this Year, 1735.

THERE will be four Eclipses this Year, two of the Sun, and two of the Moon, they happen as followeth.

The first Eclipse is of the Moon, on *Thursday* the 27th Day of *March*, near 11 a-Clock in the Forenoon; the Moon then being set below our Horizon, it will therefore be invisible. This Eclipse is made in 17 deg. of *Libra*.

The Second Eclipse will be of the Sun, and invisible also, on *Friday* the 11th Day of *April*, at 11 at Night. This Eclipse is made in 2 deg. of the *Celestial Bull*.

The Third Eclipse is of the Moon, and visible on *Sunday* the 21st of *September* in the Morn. as followeth.

The Beginning of the Eclipse will be at 16 min. 19 sec. past Midnight. The Middle thereof will be at 33 min. 27 sec. past 1. The End of the Eclipse is at 50 min. 35 sec. past 2 in the Morning.

The whole Duration 2 h. 34 min. 16 sec. The Digits eclipsed (at the Middle thereof) are 5 and

PEARSE 1735.

37 Parts, on the South-side, or lower Limb of the Moon's Body, &c.

This Eclipse falls in the 9th House in the *Celestial Ram*: As touching the Effects thereof, they are likely to afflict Churchmen, and Travellers beyond Sea; Also it falls in *England's* Ascendant, and *Mars* is Lord thereof, in the Dignities of *Mercury* in the 2d House, and in the Ascendant of *France*, if they are subject to the *Celestial Maid* there is but little Hopes of having from them Charity and Good Manners, or Hospitality and Tranquility, amongst themselves, and towards their Adjacent Countries, &c.

Frenchmen are fickle, fickle, like the Wind, And to conclude, of a *Proteus* Mind.
We are in hopes, tho' Sects and Fractions grow,
Amongst us here, that Piety will mow
Down all the Tares, and Thistles cumb'ring Weeds
And plant in Time a Sort of better Seeds,
Which may grow up and live in Peace and die,
And after live with CHRIST Eternally.

Note, on the very Day of this Lunar Eclipse, viz. Sept. 21st, we have a Δ of the two Maleficks from the latter End of \odot , and ♁ , which seems to intimate unto us, that Matters of Mundane Affairs, should (about this Time) be in a pretty healthy Condition; for ♂ and \odot smiles on each other, like two Lawyers after the Trial of a hard, or knotty Cause, shake Hands, and set down and refresh themselves, but on the 12th of *December* following, then will be an \odot of ♂ and \odot , from ♂ and ♁ ; at which Time, louring SATURN will seem to look up- on Cholerick \odot , with as pleasant an Aspect as the Envious

P E A R S E 1735.

Envious Man in the FABLE did on the Covetous, when they asked their Petition of *Jupiter*; which was granted them, &c. In my Observations on the Month *Decemb.* I shall take Notice of this last Position of H and S , &c.

The fourth and last Eclipse this Year is of the Sun, and invis. on *Sund. Oct.* the 5th at 2 o'Clock in the Morning, it falls in 22 deg. of *Libra*.

Now the Eclipses they are past and done, Next comes the Quarters Observation, }
Where I shall carefully view as I pass on:
As for the Chief'st or their Similitude,
Thereof I'll mention before I'll conclude.

PEARSE's Judgment upon the four Seasons of the Year, viz. Winter, Spring, Summer, and Autumn.

THE Winter Quarter takes its Beginning, Astronomically on *Sat. Dec. 10.* (1734) at 55 min. past 11 at Night, at which Time the Sun enters the first Point of the Tropical and Solstitial Sign *Capr.* having his greatest South Declination from the *Æquator*, making the shortest Day and longest Night in our Hemisphere.

This doleful Season with us doth remain,
Even three Months his proper Right does claim,
And sometimes four before he'll turn his Face,
So much as *Verna* may behold his Place.
Where Storms and Tempests Waters flaving too,
Our Rivers Banks as yearly *Nilus* do.

At the Sun's Ingress into *Capr.* we have 10 deg. of *Gemini* Culminating, and 7 deg. of *Libra* Ascending in our Horizon, at which Time all the Planets are under the Earth, except H and S , H is fallen into the 9th House in 8 deg. of *Taurus* Retr.

PEARSE 1735.

Retr. and δ is descending near the 7th Angle, *Sol*, *Jupiter*, *Venus*, and *Mercury* are all in the 4th, γ and η are in Conjunction in 24 deg. of γ , and θ is in 14 deg. of the same Sign, S. D. *Luna* is in 24 deg. of η in the 3d, and the ζ is in the 2d in the first deg. of the same Sign, and thus are the Heavens posited at the Commencing of the Winter Quarter.

Saturn in the 9th β near the δ denotes that the *Polonians* or *Polanders* should be under some Dispute concerning Religious Orders, but in the Conclusion they seem to appear like Boatmen and Babel-Builders; &c. *Russia* and *Persia* are afflicted with the Gripes, *Ireland* with the Pain in the Head, the Inhabitants of *England* are a little troubled with the Spleen, and the Want of good Neighbourhood, the Tradesman's Cry is Money, Money, where art thou? And the Husbandman cannot hardly raise it now, &c. But,

The Time is coming even at the Door,
To help the Husbandman and pinch the Poor;
For unkind Seasons detriment our Grain,
If prove Excess advances it 'tis plain:
No Transportation need we then desire,
Our Mouths and Bellies will it all require.

The Position of the Heavens at the Ingress (in general) and the whole Quarter also, the Planets denote cold, wet and snowy Weather, and an unhealthy Season, viz. Fevers, Small-Pox, and Agues, should be frequent, and much Uneasiness amongst Mankind, &c.

The Spring Quarter commences this Year, on Sunday, March 9. at 31 min. past 11 at Night, the Sun then entering the Oriental and Equinoctial Sign *Aries*; and has no Declination from the Equator, but rises and sets at six, making the Day and Night of an equal Length; This Quarter continues during the Sun's Progress through *Aries*, *Taurus*, and *Gemini*. This

P E A R S E 1735.

This Quarter resembles Youth, because all Things now wax green, and flourish, and is the radical Beginning of the Year, as most of the ancient Fathers think.

What to this Season nearer doth compare,
Than Youth and Beauty, which appeareth rare,
Fruit-Trees are now in Blossom very white,
The Earth's bedeck'd with Pleasure and Delight.
Each Day bright *Sol* advances on us here,
With Speed to warm our Northern Hemisphere,
Drives *Bor'as* back and thaws his Icy Chains,
Which *Hyems* caus'd, now banish'd from our Plains.

At this Vernal Ingress we have 21 deg. of Υ on the *Medium Cæli*, and 27 deg. of Υ ascending in our Horizon; at which all the Planets are under the Earth, *Mars* is fallen into the 6th in 22 deg. of *Taurus*, and *Saturn* is on the Cusp of the 6th House, in 11 deg. of the same Sign, *Sol*, *Venus* and *Mercury* are in the 4th House, in *Aries*, *Venus* is in 15 deg. and *Mercury* is in 17 deg. applying to a Conjunction of *Venus* by Retrogradation, *Luna* is in the 3d in 19 deg. of *Aqu. Jup.* in 10 d. of *Cap.* the \oslash is in 26 deg. of *Lib.* And thus are the Heavens posited at the Entering in of the Spring Quar.

Now as touching my Judgment on the Figure at the Ingress, and the Spring Quarter following, in general. First then, *Jupiter*, *Mars* and *Mercury* governs the Spring Quarter, *Mars* rules the Degrees ascending in Square to *Luna* in the 3d, which denotes a tickly Season among Servants, the Labouring Sort, or Common People, *Mars* signifies Sore Throats, and *Saturn* in *Taurus* afflicts the Heart, Breast, and Belly with Gnawing Pains and Melancholy; also Tertian and Quartan Agues should be very common, &c. Mundane Affairs are carried on with great Policy, and Contrivance, *Mercury* rules the South Angle in the Figure at

the

P E A R S E 1735.

the Ingress, and in the Sign *Aries* in the 4th, in Conjunction with *Venus*, which denotes that *France* is contriving some new Fashion to send over to *England*, we hopes for a good one, &c.

England and *France* ne'er disagreed here
In Pride and Fashions, as too plain appear.
Now they're in Peace with us Things common be
And well 'tis hop'd all's in Security:
But honest *England*! Also-innocent!
Have found that Nation oft to circumvent
Thee by fair Speeches only, to decoy,
When they had Pow'r act another Way.
So Wolves and Bears be tamed by Men of Skill,
But yet retain their brutish Nature still.

The Summer Quarter commences on *Wednes-*
day, June 11. at 29 min. past 1 in the Morning,
the Sun then making his Ingress into the first Point
of the Tropical Sign *Cancer*, having his greatest
North Declination from the *Æquator*, making the
longest Day and shortest Night in our Hemisphere.

The Summer Quarter now is just begun,
And like the Post it swiftly passeth on,
Unto the Middle as Meridian Day,
Which afterward beginneth to decay:
But yet before this Wealthy Season's gone,
Sol by his Heat brings to Perfection,
The Corn and Hay and early Summer Fruit,
And for the Late the Autumn it will do't:
To feed the Rich, the Farmer and the Poor,
That none may want untill next Winter's o'er.

At this Ingress of the Sun into *Cancer*, we
have 15 deg. of *Taurus* ascending in our Horizon,
and 19 deg. of *Capricorn* Culminating. *Saturn* is in
the Ascendant in 23 deg. of *Taurus*, *Jupiter* is in
the 9th, in 9 deg. of *Capricorn* Retrograde, *Mars*
and *Venus* are both in the 4th, *Mars* is in 23
deg. of *Cancer* and *Venus* in 8 deg. of *Leo*, *Luna* and
Mercury,

P E A R S E 1735.

Mercury be in Conjunction in 18 deg. of *Cancer*, in the 3d, and *Royal Phœbus* is in the 2d House, the ♄ and ♀ are in the 6th and 12th House, the ♀ in the 6th in 21 deg. of *Libra*, and thus are the Heavens posited at the Beginning of the Summer Quarter.

Now as touching this Figure at the Ingress of the Sun into *Cancer*, and the whole Summer Quarter in general, the Stars in their Course denotes a pretty good Season both in Weather and Mundane Affairs, but *Saturn* in the Ascendant in the Dignities of *Venus* afflicts the Female Kind with heavy Melancholy, and inward Gripping Pains: The *Moon* and *Mercury* in Conjunction, applying to the Body of *Mars*, denotes Robberies, Libels, and much Uneasiness among the Sons of Disorder, &c.

The Autumnal Quarter commences on *Friday, Sept. 12.* at 11 min. past 5 in the Aftern. at which Time 17 deg. of *Sagit.* are on the *Medium Cæli*, and 28 deg. of *Aqu.* ascending in our Horizon, ♄ is in 7 deg. of ♍ in the 11th, the ♃ is in 28 deg. of ♈ in the 10th, ♀ is in the 8th in 12 deg. of ♎, the ☉ and ☽ be in ♈ in the 7th, the Place of ♁ is 1 deg. of ♌, ♄ is also in the 7th House in 22 deg. of ♎, ♃ in 28 deg. of ♏; in the 3d, the ♄ is in 16 deg. of ♌, and thus are the Heavens posited at the Commencing of the Autumnal Quarter.

As to the Position of the Planets at the Ingress and during the Whole Quarter, they denote a pretty healthy and peaceable Season in Mundane Affairs, and a tolerable Wheat-feed-time, &c.

To conclude, Let us pray for the Welfare of *Great Britain*, and may the Blessing of Almighty GOD attend our Most Gracious Sovereign Lord King *GEORGE*, and Queen *Caroline*; their Issue, and the Rest of the Royal Family, both now and for evermore. Amen.

F I N I S.

Lately Published,

The Third Edition, of

A Treatise of Architecture, with Remarks and Observations by that excellent Master *Sebastian le Clerc*. In two Volumes. With 200 Copper-Plates, engraven by the late Mr. *John Sturt*. Translated by Mr. *Chambers*. Pr. 10 s. 6 d.

Sold by R. WARE, at the *Bible and Sun* in *Warwick-lane*.

Also may be had, just published,

(In large Octavo) curiously engraven by the best Hands, on 73 Copper-Plates, and neatly printed on a Genoa Royal,

1. The Young Clerk's Assistant: Or, Penmanship made easy, instructive and entertaining. Being a compleat Copy Book for the Practice of Youth in the Art of Writing. Together with a Supplement, consisting of select Poems on several Occasions; Moral and Divine.
